# (a) Investment guidelines

As requested by Regulation 23 of the Insurance Companies (Accounts and Statements) Regulations 1996, the investment guidelines for the use of derivative contracts for both long term and other than long term funds are set out below. These are fully explained in the Company's Investment Management Agreement with its fund manager and are consistent with the investment strategy.

  - all derivatives that impose obligations on the fund must be strictly covered.
  - all derivative contracts must satisfy the definition of approved under Regulation 55 of the Insurance Companies Regulations 1994 (as amended).
  - the maximum allowable exposure to counterparties should not be exceeded.
  - only certain permitted exchanges and contracts can be used.

### Valuation Report (continued)

- (g) Not applicable.
- (h) No reserve is held.
- (2) Not applicable.
- 7. (1) See Forms 51 and 54.
  - (2) PMA92 and PFA92 refer to the Proposed New Tables for Life Office Pensioners, Normal, Male and Female, based on 1991-94 Experiences, published in the Continuous Mortality Investigation (CMI) Reports No.16. Projected values for the year 1999 were derived using the mortality improvement factors presented at the CMI seminar on 7 December 1998.

Pate Sale

W--

- (3) All business is written in the UK and UK-based mortality tables have been used.
- (4) The mortality assumptions for annuities in payment allow for future mortality improvement at a prudent rate, in excess of that implicit in the tables derived from CMI Reports No.10 and 16. For annuity contracts in deferment a further deduction of 0.25% from the valuation rates of interest of 5.3% (Fixed) and 2.05% (Index-Linked) has been made to allow for expected mortality improvements prior to vesting.
- (5) No allowance is made or reserve is held, in addition to the assumptions in 7 (4) above, in respect of possible changes in the incidence of disease or development in medical science.
- (6) The scenarios tested were:
  - (a) a 20% decrease in fixed interest yields and a 25% decrease in real yields on index-linked stocks.
  - (b) a 3 percentage points increase in fixed interest yields and a 25% increase in real yields on index-linked stocks.

Scenario (a) was the most onerous.

- (7) Projected cashflows from the assets held and future liability payments are calculated. An iterative method is used to calculate the reserve that is required to eliminate:
  - any shortfall in the revised value of the assets compared to that of the liabilities, and
  - any reinvestment loss arising because asset and liability cashflows were unequal

under each investment scenario.

A total reserve of £180,039,000 is held at 31 December 1998.

(8) (a) No other assumptions are changed.

# Valuation Report (continued)

- (b) See answer to 7 (7) above. The reserve shown there includes the provision in respect of Regulations 75(a) and 75(b).
- (c) Under the scenario which produces the most onerous requirement:
  - (i) the aggregate amount of the long term liabilities increased by £850,901,000 after allowing for the release of the mismatching reserve.
  - (ii) the aggregate amount of the assets backing these liabilities increased by £991,230,000
- (9) Liabilities are all in sterling covered by sterling assets. There is therefore no currency mismatching.
- 8. (a) Not applicable.
  - (b) See Forms 51.
  - (c) Not applicable.
  - (d) Not applicable.
- 9. (a) See Form 54 and 6 (1) above.
  - (b) The annuity loadings in 10 (1) are calculated without assuming any contribution from the loadings in new business written after the valuation date.
- 10. (1) A real discount rate of 2% p.a. was used to convert prudent per policy renewal expenses into percentage of annuity loadings.

  The implicit per policy loadings at the end of 1998, before inflation, were approximately:

Fixed Immediate Annuities - IFAs/Group £22 p.a.

Fixed Immediate Annuities - Direct Sales £19 p.a.

Linked Immediate Annuities £28 p.a.

Deferred annuities costs were assumed to be £1 p.a. per life during deferment and then as IFA/Group IA's in possession.

Additionally an allowance was made for current systems developments.

- (2) Based on the annualised annuity payments, in payment and deferment, at 31 December 1998, the amount released to meet renewal expenses over 1999 is £7,440,000.
- (3) New business premium rates incorporate a charge to cover acquisition and set-up costs.

### Valuation Report (continued)

- (4) The annuity loadings in 10 (1) are calculated without assuming any contribution from the loadings in new business written after the valuation date.
- 11. (1) Not applicable.
  - (2) Not applicable.
- Long term business is reassured on a facultative basis to a reinsurer, who is authorised to carry on business in the UK.
- 13. to 16. Not applicable.
- 17. See Form 46.
  Group non-profit deferred annuities are not included in Form 46. These consist of 1,408 schemes covering an estimated 87,696 lives, and 2,232 individual arrangements for non-linked contracts and 18 individual arrangements for linked contracts at 31 December 1998.
- 18. See Form 47. Group non profit.
- 19. See Forms 48 and 49. No derivative contracts were held to cover long term liabilities at 31 December 1998.
- 20. See Forms 51 and 54.
  On Form 54 the figures shown in column 7 are the amounts of annuity per annum in payment; the figures in columns 11 and 12 are the total net liability including allowance for future mortality and expenses.
- 21. (1) See Form 57.
  - Yields have been adjusted to allow for default on fixed-interest and RPI linked assets other than government securities. This adjustment has been determined having regard to the nature of the portfolio and credit rating agency default probabilities. The yields shown in Form 57 Column 2 were calculated just as they would have been if the section 68 order were not in force. However, the aggregate yields on the portfolio were used to derive the valuation rates of interest in Form 57 Row 31.
  - (3) No such assets were held.
- 22. See Form 58.
- 23. See Form 60.

# Respective responsibilities of the Company and its auditors

The Company is responsible for the preparation of an annual return (including the forms, statements and the certificate) under the provisions of the Act and the Regulations. The requirements of the Regulations have been modified by Orders issued under section 68 of the Act in August 1992 and December 1995, referred to in supplementary note 0903 on page 17. Under regulation 5 the Forms and statements are required to be prepared in the manner specified by the Regulations and to state fairly the information provided on the basis required by the Regulations.

It is our responsibility to form an independent opinion as to whether the Forms and statements meet these requirements, and in the case of the certificate whether it was or was not unreasonable for the persons giving the certificate to have made the statements therein, and to report our opinions to you.

# Basis of opinions

We conducted our audit in accordance with Bulletin 1998/3 "Auditors reports on regulatory returns made under the Insurance Companies Act 1982" issued by the Auditing Practices Board. Our work included examination, on a test basis, of evidence relevant to the amounts and disclosures in the Forms and statements. The evidence included that previously obtained by us relating to the audit of the financial statements of the company for the financial year on

which we reported on 24 February 1999. It also included an assessment of the significant estimates and judgements made by the Company in the preparation of the Forms and statements.

We planned and performed our work so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the Forms and statements are free from material misstatement, whether caused by fraud or other irregularity or error, and comply with Regulation 5.

In the case of the certificate, the work performed involved a review of the procedures undertaken by the signatories to enable them to make the statements therein, and does not extend to an evaluation of the effectiveness of the company's internal control systems.

In giving our opinion we have relied on the certificate of the appointed actuary on page 53 with respect to the mathematical reserves and the required minimum margin.

## **Opinions**

In our opinion:

- (a) the Forms and statements fairly state the information provided on the basis required by the Regulations as modified and have been properly prepared in accordance with the provisions of those Regulations; and
- (b) according to the information and explanations received by us:
  - the certificate has been properly prepared in accordance with the provisions of the Regulations; and
  - (ii) it was not unreasonable for the persons giving the certificate to have made the statements therein.
